Sir:

COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

The Examiner in the Statement of Reasons for Allowance on page 2 identifies the application as directed to certain non-obvious improvements over U.S. Patent No. 4,484,858 and then goes on to identify those alleged improvements. Applicants submit that the patentability of the invention as claimed is and should be determined by the subject matter of the invention as claimed in its entirety rather than based on certain elements of the claims which the Examiner identifies as "improvements" apparently believing that those "improvements" alone impart patentability. While those identified "improvements" constitute a portion of the claimed subject matter, they do not constitute the entirety of the claimed subject matter and it is the entirety of the claimed subject matter on which patentability is based under 35 U.S.C. §102 and 103.
